WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

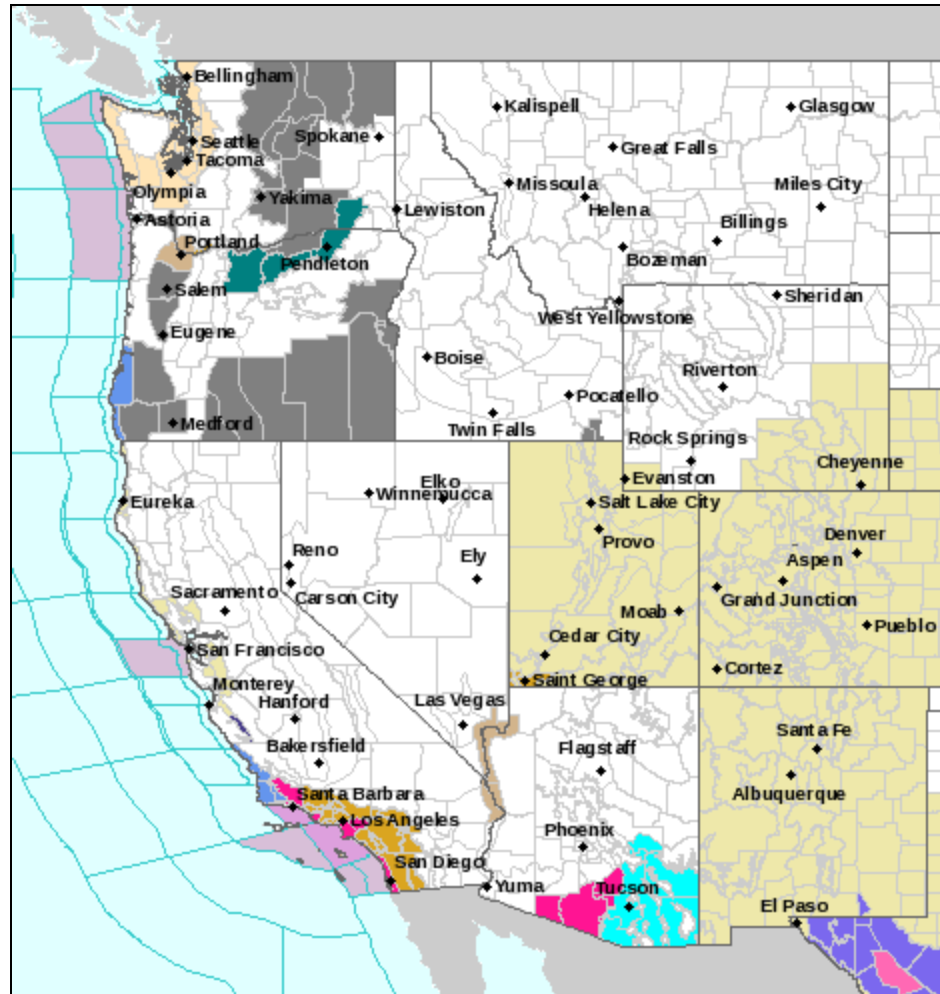

A dominant ridge of high pressure will remain persistent for at least the next 7 to 10 days. All of the weather models show this same weather pattern so confidence is high. Afternoon temperatures will be above to well above normal with overnight lows near to a little above normal. The atmosphere will be dry with unusually low humidity in most areas for this time of year. Coastal and some Sacramento Valley bottom areas should see some better relative humidity (RH) recovery by the weekend. Strong stable layers or atmospheric inversions will develop under this pattern and provide some mid slope warming and drying effects. Residual gusty N to NE and even offshore wind flow will occur today and tonight with a similar although lighter flow on Thursday. Peak gusts will generally range between 20 to 30 mph although locally up to 40 mph possible along the east slopes of the Sacramento Valley through this evening. A much lighter and more variable wind flow will start up on Friday and last into the weekend. There is potential for an enhanced N to NE wind flow early next week. Gustier winds will be more localized compared to the past N to NE wind event.

SOUTHERN CALIFORNIA

Strong surface high pressure over the Great Basin will continue to bring offshore winds of 20 to 40 mph with gusts to 60 mph to much of Southern California through Friday morning. The strongest and most widespread winds still look to occur on Thursday. The surface high pressure over the Great Basin will weaken a little starting Friday afternoon, but offshore winds will still be 15 to 30 mph with gusts to 50 mph Friday afternoon through Sunday morning. Local gusty offshore winds will continue over the wind prone areas of Southern California Sunday afternoon through Monday afternoon. Offshore winds may increase once again Monday night through the middle of next week, but at this time the winds do not look as strong as the winds this week. Local offshore winds of 10 to 20 mph with gusts to 35 mph will also continue over the Sierra and deserts through the middle of next week. These winds will also affect the Central Coast tomorrow. Minimum humidity will be mainly in the single digits and there will be very poor nighttime humidity recovery through the middle of next week. Temperatures will warm slowly through Saturday and then be around 10 degrees above normal through the middle of next week. Maximum temperatures will be in the mid 40s to mid 50s across the mountains and mid 60s to mid 70s across the Southern California Valleys today.

Cal OES LAW ENFORCEMENT MISSIONS

Cal OES Law Missions

- **2017-LAW-43617, 12/5/17 at 1900 hours:** San Benito County Sheriff's Office requested the assistance of Cadaver K9's to search a property in Hollister on 12/06/17 at 0900 hours. Two (2) K9's and their handlers accepted the mission from Santa Clara County. The search is for a female who has been missing in that area for eight (8) days. **Mission Ongoing.**
- **2017-LAW-43535, 12/03/2017 at 1900 hours:** Placer County Sheriff requested the assistance of 10 Type-1 searchers to locate a missing 33 year old female who walked away from her car after it drove off of the roadway. A tracking canine led searchers to the mouth of a steep canyon, before the search was suspended due to darkness. The subject was last seen dressed in a skirt and heels, and was unprepared for the terrain and cold temperatures. Nevada, El Dorado, and Calaveras County Sheriff's Offices deployed searchers for a 0700 briefing in the Auburn area. **UPDATE, 12/04/17, 1600 hours:** The missing person has not been located. Placer County requested 50 Type-1 and Type-2 ground searchers to report to the Auburn ICP on 12/05/17 at 0700 hrs. **UPDATE, 12/05/17, 1600 hours:** Placer County Sheriff's Office requested an additional 20 Type 1 searchers and 3 Mountain Rescue Teams for continued search efforts on 12/06/17. **Mission Ongoing.**
